Conditions-

1. The Township Planning Commission may impose reasonable conditions with the approval of a special land use application and site plan which are necessary to ensure compliance with the standards for approval stated in this section and any other applicable Township ordinances and regulations. Such conditions shall be considered an integral part of the special land use permit and approved site plan and shall be enforced by the Zoning Administrator.
2. The conditions may include conditions necessary to ensure that public services and facilities affected by a proposed land use or activity will be capable of accommodating

increased service and facility loads caused by the land use or activity, to protect the natural environment and conserve natural resources and energy, to ensure compatibility with adjacent uses of land, and to promote the use of land in a socially and economically desirable manner.

3. The Planning Commission, at its discretion, may require greater setbacks than otherwise established for the district in which the proposed special land use would be located where it is determined that one or more of the following conditions exist:
 - a) the proposed use will create noise, light, odor or similar potential nuisances affecting adjoining properties, the effects of which could be reduced or eliminated by increasing the separation from those uses;
 - b) adjacent property, even if vacant, is zoned Residential and the compatibility of the proposed special land use with existing or future dwellings could be substantively improved by increasing the setback for the special land use along the Residential property line;
 - c) due to the nature of the special land use, there is the potential threat to the health, safety or welfare of adjoining properties because of traffic, litter, trespassing or similar impacts that could be reduced or eliminated by increasing the separation from those uses; or
 - d) natural features, such as a significant vegetative screen, wetlands or topographic variations that would moderate the impacts of the special land uses could be preserved by modifying the setback requirement.

Performance Guarantee-

In authorizing a special land use permit, the Township Planning Commission may require that a cash deposit, certified check, or irrevocable bank letter of credit be furnished by the developer to ensure compliance with an approved site plan and the special land use permit requirements. Such guarantee shall be deposited with the Township Clerk at the time of the issuance of the special land use permit. In fixing the amount of such performance guarantee, the Township shall limit it to reasonable improvements required to meet the standards of this Ordinance and to protect the natural resources or the health, safety and welfare of the residents of the Township and future users or inhabitants of the proposed project or project area including, but not limited to roadways, lighting, utilities, sidewalks, screening and drainage. The term "improvements" does not include the entire project which is the subject of zoning approval nor to improvements for which a performance guarantee has been deposited pursuant to Act No. 288 of 1967, as amended. The Township and the project developer shall establish an agreeable procedure for the rebate of any cash deposits required under this section, in reasonable proportion to the ratio of the work completed on the required improvements as work progresses. Said agreement shall be written as an element of the conditions surrounding the approval of the special land use permit.

Did not vote on this.

Chairman David Schultz announced that the Motion was Approved for the SLUP at 11522 Landon Rd.
